

# Climate risk & natural catastrophes

## Closing the Protection Gap

Olaf Sleijpen – Director of Insurance Supervision  
Luxembourg – November 9<sup>th</sup>, 2018

DeNederlandscheBank

EUROSYSTEEM

# The Dutch Central Bank embeds sustainability in her core tasks, with a focus on sustainable finance and climate related risks

## Sustainable finance

- Host of the **National Platform for Sustainable Finance**
- Founding member of the **Network for Greening the Financial System (NGFS)**
- **Report** on sustainable investment in the Dutch pension sector

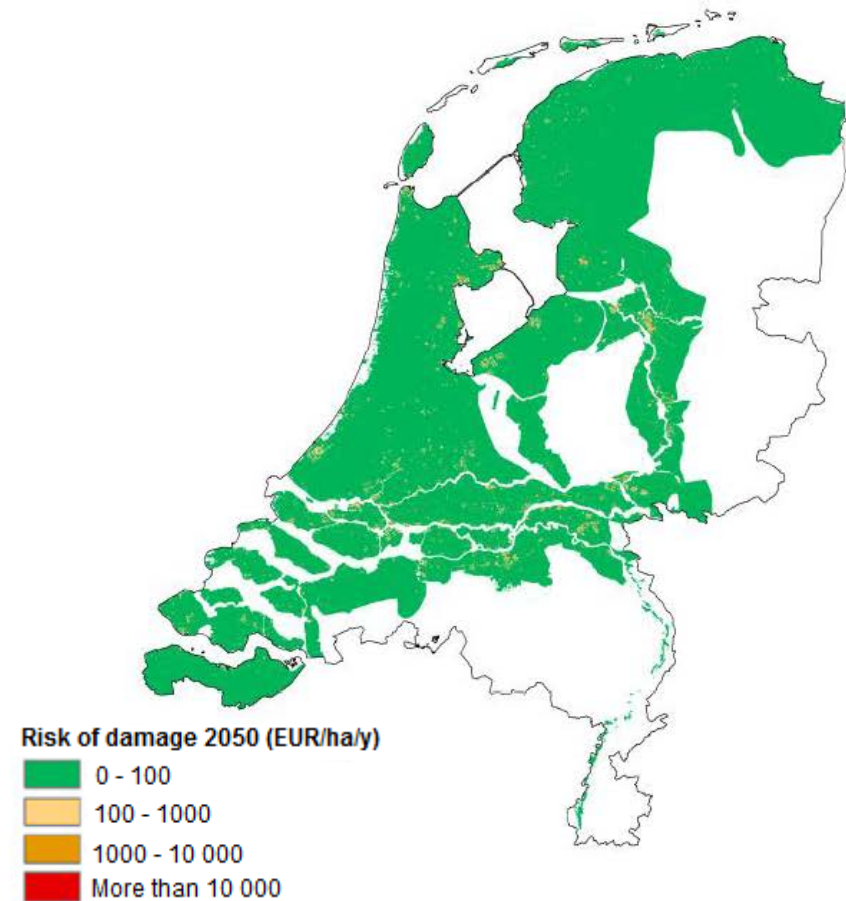

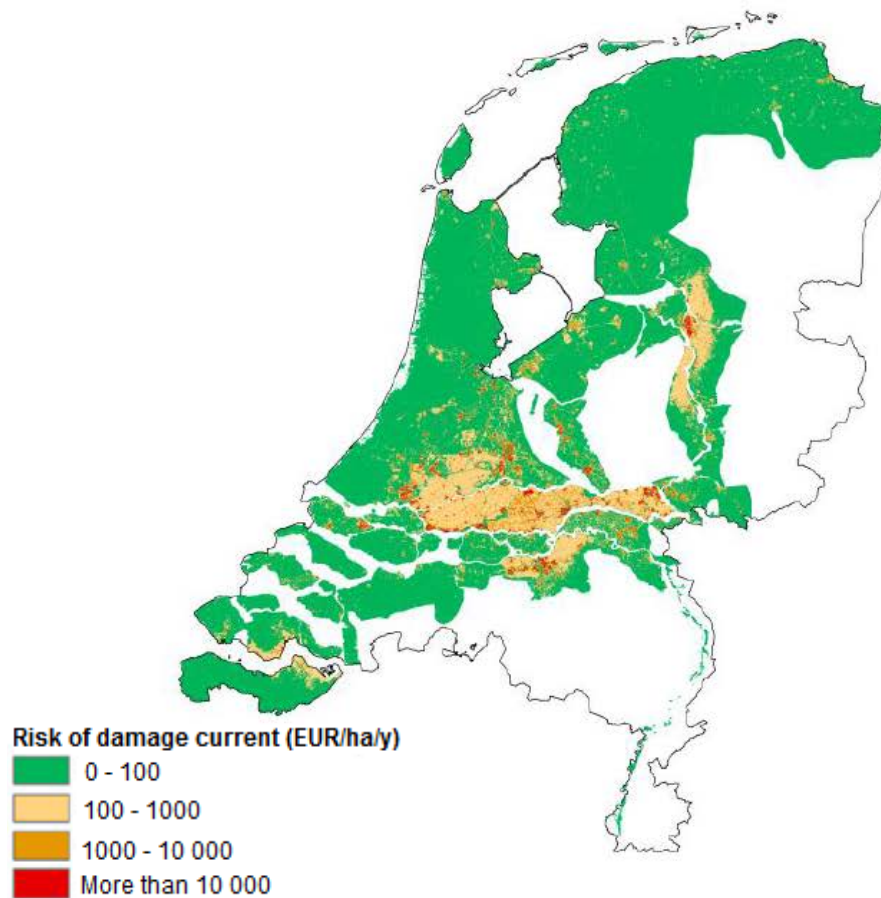

DNB works to achieve **financial stability** and thereby contributes to **sustainable prosperity**

## Climate-related risks

- **'Waterproof' Report** on climate-related financial risks in the Dutch financial sector
- Development and application of **climate-related stress tests**
- Embed climate-related risks more firmly into our **supervisory approach**

In the Netherlands, flood risk is typically uninsured – the government plays a major role by providing a public safety net

## Towards flood risk insurance? – A few considerations

- DNB welcomes and supports initiatives to develop this market
- Coverage structures are conceivable in many shapes and sizes
  - Need for public – private cooperation
  - Using the international reinsurance capacity
- DNB assesses from a prudential supervisory perspective

Thank you for your attention – Any questions?
